Progress Report

- Read the paper on Texture Image Decomposition and gained useful insights
- Steel Segmentation - Have augmented images based on some of the criterion used by the model given to me by professor. Have not started training yet, *but will do soon*.
- Website - The website is 2 pages done and Yubin has written some APIs. We created a Docker Container and now are implementing the website there to show a smooth functioning and cohesive interaction. *Will submit to you for a review by **tomorrow**.*
- I have started writing the Proposal, and will *submit you a draft by **Tomorrow night**.*
